Elliott Group Graduate Programme

Elliott Group are a family-owned, Tier Two main contractor operating in the UK and Republic of Ireland.

Our DNA

The Elliott family has a long tradition in the construction industry, which dates back to the 1940's. We pride ourselves in delivering landmark projects for our clients in Ireland and the United Kingdom, through commitment, innovation, experience and a "can do" attitude. This is only possible because of the team of talented people we have working for our organisation.

Your Success

We provide our graduates with the opportunity to develop their skills within a professional, hands-on environment.

Our goal is to help you gain experience in all areas of the construction industry in order to give you a complete understanding of the industry in full.

We commit to supporting you in being the most successful you can possibly be.

What to Expect

A structured programme that has been designed by our team to give you the best experience across all areas of the construction industry.

Your focus will be based on your area of study with dedicated mentors to ensure your development. They will provide regular feedback along with guidance on personal development and accreditation.

Our hands-on approach resonates throughout the company so you will benefit from a wide range of relevant and first-hand experience.

Exceed with Elliott Group

For graduates, this is your first step toward a career in construction.

The skills, knowledge and experience you will gain on this programme will ensure that you are on the right path in the construction industry. This will ensure that you reach your personal career goals.

Our Elliott Group Graduates

Meet some of our recent Elliott Group Graduates who are still working with us today.

Caolan Mellett
Senior Project Engineer,
Elliott Group

I studied Construction Management in Dublin Institute of Technology.

I was looking to find a construction company where I could implement my skills while also continuing to learn. I felt that working with Elliott Group would allow me the best opportunity to accomplish these goals.

I was extremely lucky to work on a healthcare and a residential project during my initial time with Elliott Group. On both of these projects I was given a high level of responsibility and was entrusted with key elements within the

development of the project.

My experience with Elliott Group has been full of support and mentorship from those around me. I have felt that I always had support from every individual, from Director to site colleagues. From my early I felt guided and supported in my decisions and this continues today.

I recently worked as a project engineer on a 110V Sub Station, and today, I am a Senior Project Engineer on a high-end 12 story apartment build. (See opposite page.)

I would recommend other graduates to choose Elliott Group as there are many opportunities to develop and grow within the company.

The skills and knowledge that you have gained from your time in college will be fostered and developed within Elliott Group and you will be enabled to continue learning and bettering yourself.

During my time at Elliott Group thus far I have been encouraged to strive to progress within the company and this is a positive of working with the company.

Paul Leddy
Junior Quantity Surveyor,
Elliott Group

I studied Quantity Surveying and Construction Economics in TU Dublin. I joined Elliott Group during summer holiday from college in 2019. I also done work placement and worked part time while in college. After graduating in 2021 I was delighted to be given the opportunity to join the company full time.

The coaching and mentoring I received from each of my managers was excellent, and they are genuinely interested in your

development and progression. In a short period of time, I have gained experience in many different sectors such as healthcare, residential and commercial projects. This broad exposure to various areas of construction has given me a great base from which to start my career in the industry.

Elliott Group is very supportive of further education and allowed me to work part time during my final two years at college.

My role now is a site based quantity surveyor reporting to a commercial manager. (See opposite page.)

Elliott Group is a good place to be if you're interested in learning new skills and improving your knowledge and experience. I've learnt a lot of new talents and want to learn many more as time goes on.

Exclusive Eglington Road, Donnybrook
Residential Development. 148 PRS Units
(Caolan Mellett)

Windmill, Clonsilla
Residential Development. 211 Apartments
(Paul Leddy)
