Heritage

Elliott 🐼 GROUP

Almost one hundred years ago, Patrick Elliott, a gifted stone mason, along with his wife Alice, a capable and strong administrator, established the first Elliott Group construction company in the midlands of Ireland. A formidable team, they established the business while raising 12 children.

In an industry that is ever-evolving, the company continues to remain a traditional, family-run, handson business, with five office locations across Ireland and the UK.

Since our company was founded, much has changed, however one thing remains the same: a commitment to quality, reliability, and master craftsmanship.

Patrick Elliott (4th from left) with the original construction team

One of Ireland's leading construction and fit out companies, delivering a hands-on, first-class service, to ensure the highest standards are achieved on every project.

Introduction

Darragh is a graduate of the Limerick Institute of Technology holding a Bachelor of Science in Construction Economics.

In the past, Darragh held the role of Director of UK operations with P. Elliott & Co Ltd. He has comprehensive experience in a broad variety of project types, including Residential, Healthcare, Educational, Commercial, Leisure, Retail & Civil Engineering Works.

Darragh's professional and hands-on approach has ensured that all projects have been delivered to the highest standards and on target with an exemplary safety standard and safety record that has been delivered time and time again.

Noel has over 27 years of experience in the construction industry in Ireland and the UK and has a reputation for delivering for clients and design teams requirements on each and every project he is involved in.

The ethos that Noel has adopted and instilled in his team is reputation driven and the company, its clients and by extension, the project is always put first.

Noel's core role is to lead the company from initial business development to estimating, commercial management and to oversee the execution at the steering level on all projects.

"Construction is a tradition in the Elliott Family which dates back to 1927. Three generations later our people pride themselves on delivering a first class service to ensure the highest standards are achieved on your Project. Experience, loyalty and commitment are the key ingredients for our success. Whilst never forgetting our roots, we embrace new technologies to drive value, efficiency and quality for our Clients."

Quality

Quality Management

Quality is not only defined by our clients, regulatories, policies and guidelines, it is defined by the procedures we put in place as part of our construction quality management plan. Our management team work with a hands-on approach and will have early involvement for full visibility and planning with you, our client.

A full understand of expectations and standards is reached and agreed upon, which is the benchmark for all inspections and audits throughout the project term.

Quality Assurance and Control Planning

+ Standard Operating Procedures

Our dedicated Building Control Manager leads all quality management work, and is responsible for the day-to-day operations. The Building Control Manager works with the construction and design teams to identify QA risks and agree on mitigation measure, as well as developing a quality control plan which will include;

+ HSEQ Policies

+ Quality Forms

+ Quality Risk Register

+ Test and Inspection Plan

+ Control of Non-Conformance

+ Subcontractor and Supplier

+ Surveillance

+ HSEQ Manual

- + Quality Templates + QA Construction Checklists
- + Quality Specification Standards

These ensure the project is successful from an administrative perspective as well as achieving and maintaining the highest levels of quality specification, design and workmanship. The project management team work closely with our Health, Safety, Environment and Quality team to uphold company policies and procedures. These relationships are encouraged and supported through all levels of the company to promote an open and safe working environment.

- + Communication Standards
- + Practical Completion
- + Project Audits

Preconstruction

Eric Leonard Group Preconstruction & Planning Manager

Our Preconstruction and Planning team are involved in every project once the invitation to tender is received. At tender stage we utilise the following workflow on all projects.

All tender documents are reviewed once received so our team has a through understanding of the scope. If there is no 3D model we commence building one.

Constructability Review

Detailed constructability reviews for elements such as substructure, superstructure, envelope, roof and internal finishes to understand the elements unique to the specific project and complete our model to the appropriate level of detail.

Logistics Plans

We produce 3D logistics plans to help plan the logistics, specific focus is placed on crane positions, temporary works such as scaffolding and access and egress routes.

Micro Build Sequences

Once our constructability reviews are completed we prepare micro 3D sequences to detail specific assemblies such as structural assemblies for typical floors, envelope buildups, roof details.

4D Construction Sequence

For our final tender submission we prepare a fully detailed 4D construction sequence to articulate our proposed construction methodology and programme.

Procurement

Gerry McCaffrey Group Procurement Manager

At Elliott Group, our procurement team revolves around fostering sustainable relationships within our supply chain to ensure consistent high quality and value across every project and location.

Our dedicated procurement team operates with integrity and diligence, continuously striving to optimise procurement processes for maximum efficiency and effectiveness.

Elliott Group | Procurement

Elliott Group's Procurement Department, focus on quality and sustainability to guide our operations.

We carefully select suppliers, prioritising local sourcing. Our dedicated team collaborates closely with partners to ensure each procurement decision adds value. Building lasting relationships with suppliers and subcontractors, we consistently deliver projects to the highest standards.

Our approach sets the benchmark for excellence in procurement, delivering unparalleled quality and value across every project and location.

1 | Supply Chain Management

Our commitment to excellence begins with our supply chain. We've cultivated a sustainable and trusted network that consistently delivers the best value and quality.

2 | Procurement Management

Our procurement team serves as the cornerstone of our operations, collaborating closely with our supply chain partners to drive innovation and excellence in every aspect of our projects.

3 | Supplier Partnerships

We take pride in our longstanding collaborations with key suppliers. As we continue to grow, we actively seek out new partnerships, enriching our supplier base and unlocking new opportunities for growth and innovation.

4 | Sub Contractor Partnerships

Large portfolio of trusted partners work seamlessly with us, consistently delivering projects to the highest standards across diverse regions.

5 | Local Support

By prioritising local employment and supporting regional suppliers, we create stronger ties within the communities where we operate for sustainable development and social responsibility.

Owen Walsh Aftercare

At Elliott Group, We recognise that one of the most critical stages in a project is when occupants move into a new building and have to settle into their new environment.

That's why we offer a dedicated Aftercare Division to support you during the early weeks of occupation. Our Aftercare Division provides a personal and immediate response service, offering in-person communication and assistance. The team will be on hand in the weeks before handover to ensure a thorough understanding of building operations and to liaise with the client and fit out teams.

Elliott Group | Aftercare Division

At Elliott Group, every project receives comprehensive Aftercare service and a 12-month Defect Liability plan. Weekly, a member of our Aftercare team will reach out to building management to address any snags or defects.

Our Aftercare team receives full support from both our Procurement and Construction/Fit Out teams, leveraging their wealth of experience and knowledge to swiftly and efficiently resolve any issues that arise.

We are dedicated to delivering a personal and professional service with direct communication and thoroughly documented processes and activities.

1 | Investigation

All potential snags or defects undergo a comprehensive investigation to determine their nature, whether they should be categorised as a snag or assigned to maintenance.

2 | Priority Allocation

Each snag is prioritized based on its nature, ensuring that the appropriate response and solution are provided efficiently.

3 | Expert Involvement

If our Aftercare team cannot resolve the issue personally, we leverage our trusted network to assign the appropriate subcontractor or specialist, guaranteeing expert assistance.

4 | Client Communication

We maintain transparent communication with the client's building management contact, providing regular updates on snag activity until resolution. All correspondence is meticulously documented for transparency.

5 | Proactive Approach

Regular review meetings, in addition to consistent contact, allow us to identify trends or patterns, enabling proactive resolution of snags and preventing future issues.

A structured process of investigation, prioritisation, expert involvement, transparent communication, and proactive review, ensures efficient resolution and client satisfaction

This proactive approach minimises disruptions, enhances project outcomes, and improves user experience.

Health, Safety, Environmental and Quality

Matthew O'Dowd Group HSEQ Director

Elliott Group's Zero Risk policy is a tangible statement to our clients, staff, subcontractors and third parties that we strive to operate on a zero risk in the key areas of Safety, Environmental, Quality and programme delivery.

As a company we measured ourselves by how we perform in these key areas.

Health & Safety

Health, Safety, Environmental and Quality

Awareness and Training

- + Throughout all Elliott Group projects, all members of the project team take part in group Environmental Awareness Training.
- + Training programmes are delivered by an external trainer and include Electricity, Lighting, Heating, Waste Control to ensure best practice onsite.
- + HSEQ team regularly deliver Toolbox Talks on Environmental Awareness Procedures.
- + All staff are actively encouraged to supporting lasting benefits to local business and communities.

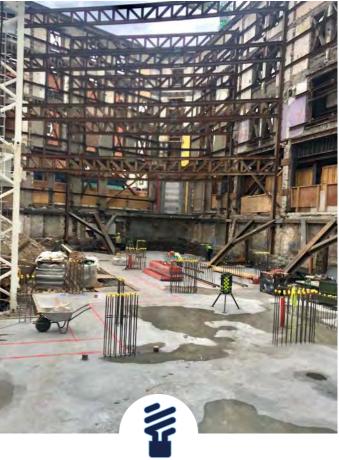

Wellness Committee

- + In 2021, a new initiative was launched to create an internal Wellness Committee, open to all levels within the company.
- + This committee is tasked with coordinating activities and initiatives to improve the working environment, to engage with our local communities and to empower our work force to have a voice and to feel safe in speaking out.
- Initial efforts include anonymous welfare surveys, team building activities and events, health & fitness incentives and voluntary charity support.

Community

- Here at Elliott Group we recognise the value of our next generation. We strive to employ up to 5% of our workforce as apprentices, trainees and graduates.
- + Our Employee Volunteering Policy is implemented to support and encourage our employees to volunteer with charitable causes within the communities we work.
- + Elliott Group will aim to comply with and report against our Clients and customers supply chain charter on responsible procurement practices.
- + All our projects will have a social value champion who will work with the local communities to develop and employ people within the local catchment of the project.

Materials

+ Elliott Group strive to work with our clients, customers and supply chain to reduce all avoidable waste generated on site and divert this waste from landfill to ensure materials have a second life.

+ Elliott Group aim to remove all single use plastics from our offices and projects.

 Our targets seek to reduce our potable water use intensity by 50%, introducing rainwater harvesting techniques.

+ We aim to successfully embed circular economy principles into our operations, such as take back schemes when purchasing packaging, and utilising surplus material.

Health, Safety, Environmental and Quality

netzero Zecersk everyone goes home safely

At Elliott Group, we set high standards in safety, health, quality and social responsibility. We work collaboratively with our partners and our team to improve the environment and community we work within and leave a legacy of regeneration, while maintaining the wellbeing and safety of our people.

Awareness

Environmental Awareness Training.

Internal Wellness Committee to coordinate and engage actions.

GROUP

Eglinton Road | Live Project Donnybrook, Dublin

When complete, the development on Eglinton Road will provide 139 apartments, nine Duplex units and resident amenities over 12 floors with a basement carpark.

Eglinton Road, has been designed to provide 139n apartments, 9 2-bed Duplex units and associated communal facilities, basement carparking and ancillary accommodation in line with the standards set out in the Sustainable Urban Housing: Design Standards for New Apartments (2018).Situated on the corner of Eglinton and Donnybrook Road, this landmark site is perfectly located at the entrance to Dublin City. You could not ask for a better location with Donnybrook Village and its array of shops, restaurants, bars and cafés as well as the Hebert Park on your doorstep.

These apartments have been designed to ensure that maximum light penetrates each room. This development will feature contemporary style apartments that are light-filled and generous in size over-looking an internal courtyard garden. Connectivity could not be better with the Quality Bus Corridor outside your door and access to the train and Luas nearby.

The Crossings at Adamstown, Phase 3 – Blocks ACD | Live Project Adamstown Station, Dublin

The Crossings at Adamstown is part of the development lands located within the Adamstown Strategic Development Zone (SDZ). The proposed development consists of 436 residential units across 3 separate apartment block phases. Phase 3 is bounded by Adamstown Avenue to the North, Phase 1 (Blocks B, E & F) to the East, Phase 2 (Block G) to the East. to the south by Station Road, the railway line and train station and to the west by the railway overpass and its approach road, known locally as 'the farmer's bridge'.

The Crossings at Adamstown is the key district centre in the Adamstown SDZ Planning Scheme and is bounded by primary roads, including Station Road, Adamstown Park, Adamstown Avenue and Adamstown Boulevard, which are complete.

Phase 3 – Blocks ACD Scope of Works Block D

 Building D ranging between 1 – 5 storeys, containing 168 residential apartments and own door units and extensive landscaped areas around the building.

Block A

 Building A ranging between 4 – 5 storeys, containing 144 residential apartments and own door units and extensive landscaped areas around the building.

Block C

- Building C ranging between 5 9 storeys, containing 124 residential apartments and own door units and extensive landscaped areas around the building.
- There are infrastructure works around the perimeter of the site to tie into the existing road network, utility connections, upgrade works to footpaths, roads, 'farmers bridge' bicycle lanes and pedestrian crossings.

Cork Street Shared Living | Live Project **The Liberties, Dublin 8**

Co-Living is a multifamily model where residents share the common areas of units such as living rooms and kitchens while retaining their private personal spaces.

The proposed development will principally consist of: the construction of Build-to-Rent Shared Living Residential Development compromising 371 No. bed spaces with circulation cores, providing a Gross Floor Space of 14,047 sq m (plus an ancillary basement of 513 sq m). The Gross Floor Area of the scheme above ground is 13,224 sq m over a basement of 1,336 sq m.

The development also consists of the provision of a café (156 sq m) at ground floor level; communal kitchen/living/dining rooms at each floor level to serve the residents of each floor; communal residential amenity space at ground floor level including the provision of a reception/ shared communal area, a communal lounge/ social room, a multipurpose room, a private function room, a cinema and yoga space, a gymnasium and a library and workspaces; resident support facilities including a laundry, a concierge/ post room, accessible toilets at ground floor level, a staff room and a bin store; landscaped amenity gardens; an external balcony/terrace facing south at first to fourth floor levels (15 sq m per level) accessed from the communal living/kitchen/dining rooms; a roof garden facing north, south and west (144 sq m) and a balcony/terrace facing south (15 sq m) at fifth floor level; and a balcony/terrace at sixth floor level facing south (30 sq m).

Value	€50,000,000
Client	Grayling Properties
Location	Dublin
Programme	26 Months
Size	371 Bed Spaces

Sherriff's Gate | Live Project **Worcester**

Sheriff's Gate is one of the largest mixed use developments ever to be undertaken in Worcester.

Worcester City Council has given planning approval to phase one of the three-phase scheme, and backed the remainder of the development in principle. Phase one of the scheme involves 213 one and two-bedroom homes and the scheme as a whole will create 650 homes. The development also has planning permission for nearly 13,000 sq ft of commercial space. The Sheriff's Gate development as a whole will involve transforming 900,000 sq ft of industrial land in the Shrub Hill area of the city, creating new homes, business units, a cinema, a hotel, leisure facilities, 1,000 car parking spaces, retail units and an 80-bed care village. The Elliott Group have been selected as the main contractor of a residential apartment development within Phase 1.

The development consists of 213 apartments in a resdiental block. The development is broken into two blocks. Block A1 & Block A2.

Hornchurch | Live Project Essex

The Hornchurch development is proposed to replace the existing car park with a muchneeded, sustainable development comprising an 87-Bedroom care home, providing residential, nursing, dementia and end-of-life care with extensive communal facilities, and 3 self-build houses, on this brownfield site. The building is predominantly 3 storeys in height, but it is set back from Nelmes Way, with views from existing homes screened by the retention of many existing trees and new planting.

Architecture

The early approach to the architecture has been informed by both the immediate context along Nelmes Way as well as the more historic charm of Ardleigh House. It is proposed that the new building will use traditional materials and form combined with elegant contemporary detailing.

The building will comprise of brick elevations with subtle variations in tone between 'elements' particularly along the Nelmes Way frontage, this will help to gently express the idea large dwellings rather than a single building in this part of the site. Large brick gables will include elements of textured detailing, deep set reveals and a celebratory expression of chimneys referencing the materials and handsome detailing seen on Ardleigh House.

The roof will be tiled with clipped eaves and high quality UPVC windows and rainwater goods. The entrance will have a rich crafted quality and seek to incorporate scheme signage into the architecture.

K West | Live Project Shepherd's Bush, London

This project involves the total strip out of an existing 7 storey Hotel in Shepard's Bush, London back to shell and core. The space is then reconfigured into a 231 bedroom high spec 4 star Indigo branded hotel.

The work consists of a new spa leisure area in the lower ground floor complete with swimming pool and gym. Additional outdoor space is created adjacent to the spa area to provide outdoor facilities for the gym and spa areas.

On the ground and first floors a new reception, bar and restaurant is created along with meeting and conference rooms. This project has a very aggressive 58 week programme with a 2 phase handover and total cost £39.5M

Value	£39,500,000
Client	K West Hotels
Location	London
Programme	58 Weeks

Runnymede Hotel | Live Project Runnymeade, Egham, London

This project consists of an extension to the existing Runnymede-on-Thames Hotel and Spa for the Bourne Leisure Group.

The works involve the design and build of a new 23 Bedroom block and a new auditorium building both of which are directly connected to the existing building.

Both extensions are formed using a structural steel frame with SFS and rainscreen cladding. As the hotel is located adjacent to the river Thames the ground floor is constructed 1.5m to 2.0m above existing ground on concrete columns as flooding from the river is a regular occurrence.

The works which include a full Cat B fitout to both areas are completed while the existing hotel remains in full operation.

In addition to the extensions a new car park area and landscaping works are completed.

Value	£10,800,000
Client	Warner Hotel Group
Location	Runnymeade, Egham, London

Holiday Inn Express | Live Project Peartree Roundabout, Oxford

The project consists of the construction of a four-storey block comprising a ground floor, with nine guest rooms, two meeting rooms, a break-out area, a linen store and toilets, and three upper floors each with nineteen guestrooms adding a total of 64 rooms to the existing hotel.

The building is constructed on a piled foundation with a 4 storey insitu concrete frame with a combination of a brick and render cladding and aluminium windows including frameless Oriel windows at Ground floor level.

External works include landscaping and paving to match in with the existing building and environs.

Value	£8,900,000
Client	LGH Hotels Management, UK
Location	Oxford
Size	64nr Room Extension

ICICLE 114 Grafton Street, Dublin

Icicle currently has a number of high-end outlets in Paris, France and the one in Dublin is going to be their first retail in Ireland. Icicle will follow the same Interior concept applied to all existing stores in Paris whilst respect the nature of the building at 114 Grafton Street, Dublin which is a listed building.

This project includes the construction, Design development and commissioning of their new retail store. Works include the adaptation of the interior structure, removal of escalators and adjustment to floor levels. Fit out works include stripping and reinstallation of floor finishes, construction of partitions, new joinery, refurbishing of windows and signage as well as the preservation of existing features, mouldings etc.

Key Requirements & Challenges

Being a listed building, the preservation of its historical character was one of the core aspects of this project which itself presented with the challenge of applying the client's strong design identity to suit the space in respect of those elements that need to be preserved.

Built heritage conservation preserves and prolong the integrity of old structures while accommodating changes necessitated by occupants or by environmental factors. This involves respecting the original design, materials and craftmanship of buildings and structures in order that they retain authenticity and character.

In an urban environment such as Dublin, building conservation takes on an added layer of importance, as traditional building form the essential building block of the city. It is these elements that collectively generate urban distinctiveness, character and sense of identity.

Other Key element was the introduction of the mechanical system without being on show in respect of the client's desire of keeping it concealed and not in view to the necked eye.

Being an old building there was several fire upgrade works requirements. Moreover, the building was subject to numerus floods in the basement which challenge the Design team in mitigating around these issues. Several water leaks from roof and facades also had to be repaired prior to any site works commencement.

The site logistics, being located on the Luas line, is being a delicate operation – with taking in and out deliveries of materials, the removal of the escalator which had to be cut up into smaller sections and removed from site, the delivery of large joinery items.

Cusack Stand Refurbishment - Croke Park | Live Project Drumcondra, Dublin

The Cusack Stand Refurbishment project appears to be a comprehensive renovation of the Cusack Stand's corporate facilities, aiming to enhance the overall experience for visitors and align the facilities with modern standards. The key aspects of this project include:

Upgrade of Corporate Boxes on Level 6:

This likely involves refurbishing the interior design and amenities to provide a more luxurious and comfortable experience for guests using these boxes.

Renovation of Corporate Suites on Level 5: Similar to the corporate boxes, these suites will be modernized, with high-end furnishings and technology to cater to corporate events and meetings.

New Bar Facilities on Level 4:

The addition of new bar areas will likely cater to the refreshment needs of guests, possibly featuring modern design and a variety of offerings.

This contemporary joinery along with modern floor and ceiling finishes, indicating a significant aesthetic overhaul to provide a sleek, contemporary look.

Improvement of Corporate Entry at Level 1:

The entry point sets the tone for guests, so upgrading this area is crucial for creating a positive first impression. This will involve aesthetic enhancements to all circulation routes and streamlined access procedures.

Upgraded Mechanical and Electrical Systems:

This is an essential aspect of modernizing any building, ensuring that the heating, ventilation, air conditioning, and electrical systems meet current efficiency and safety standards.

Additional Lift Shaft for Access to Level 7:

Improving vertical circulation within the facility is crucial for ease of movement, especially for a multi-level stand like the Cusack Stand. The new lift shaft will enhance accessibility, particularly for guests going to or coming from the upper levels.

Overall, this project aims to significantly enhance the corporate hospitality experience at Croke Park, ensuring that the facilities meet contemporary standards and provide a comfortable, efficient, and aesthetically pleasing environment for corporate clients and guests and the wider GAA community.
